Care English School Higher Education	June 2017

Projects

E Commerce https://tinyurl.com/bddc33u9	December 2023
<ul style="list-style-type: none">Developed a robust e-commerce website using Java 8 and Spring Boot 2 for a seamless online shopping experience.Utilized Visual Studio Code as the IDE for efficient code management and development.Built a responsive front-end with HTML, CSS, JavaScript, and Bootstrap for a user-friendly interface compatible with Chrome.Employed MySQL Workbench for secure database management, facilitating storage and retrieval of product information and user accounts.	

Student Portal	June 2023
-----------------------	------------------

Student Resource Website

Technologies: Front-End (HTML, CSS), Back-End (PHP), Database (phpMyAdmin), Deployment (Apache Tomcat, Visual Studio)

- Spearheaded the development** of a student portal to provide easy access to the previous year's exam papers, admit cards, and results, enhancing student engagement and resource accessibility.
- Designed and developed** a responsive, user-friendly front-end interface using HTML and CSS, ensuring a seamless user experience across multiple devices.
- Implemented dynamic back-end functionality** using PHP, enabling efficient handling of user requests, data retrieval, and content management.
- Integrated the database** with phpMyAdmin, ensuring secure and efficient data storage, retrieval, and management.
- Deployed the application** on Apache Tomcat, optimizing its performance for reliability, scalability, and accessibility.
- Troubleshooted and resolved deployment issues**, ensuring smooth application functionality and a flawless user experience.
